Community Project Partnership: DSCD Advanced Carpentry Class

Our District Vision

Inspiring children to develop a passion for learning and a commitment to make a better world for themselves and their community.

Our District Mission

We are a community united to improve the quality of life through education.

In an effort to provide students with a hands-on, trade-based education while at the same time improving the quality of life in the community, the DCS Community Project Partnership has been created. Through the Advanced Carpentry Course, DCS students will work under a certified instructor to complete carpentry projects in the community. Under this model, students are learning and community members are able to afford small projects that are needed for their home or business. Owners in the community will be eligible to apply for a project. The procedures to be followed include:

STEP 1	Community members (business owners and home owners) fill out the community project application. Applications can be found in the high school lobby or on the school website at: https://www.depositcsd.org/CTE.aspx Completed applications are submitted to Hal Pettersen, Middle School/High School Principal or to: projects@deposit.stier.org
STEP 2	The Community Project Partnership Committee meets to review the applications and agree on potential projects that meet the criteria.
STEP 3	If a project meets the criteria, the instructor will contact the owner to set up a site visit to ensure viability and estimate costs.
STEP 4	Following the site visit, the committee will meet again to confirm viability. If a project is approved, the instructor will contact the owner to inform them of approval. The owner will be provided with a) the finalized application with approval b) the "agreement" to be signed and c) the Community Project Work Order which includes a description of the work and an estimated cost of materials. If the project is rejected or pending, Mr. Pettersen or Mrs. Campo will notify the owner.
STEP 5	When the agreements are finalized, the instructor will designate a start date and estimated completion time with the Owner.
STEP 6	When the project is finished, the Owner and District will sign the appropriate form to indicate completion.
