Dear Deposit CSD Families,

Pesticide application may occasionally be necessary at Deposit Central School. Under New York State Educational Law, schools are required to maintain a list of individuals who wish to receive written notification prior to pesticide use. Upon your request, you will be added to this list and be provided with 48-hour notification prior to the application of pesticide. Included in the information will be the specific date, time, and location of application.

Certain materials are exempt, and their applications shall not be subject to prior notification requirements, including emergency application of a pesticide when necessary to protect against an imminent threat to human health.

Further, under this law, a notice will be posted in a conspicuous place to those dropping off or picking up children at these facilities 48 hours prior to application.

Please do not hesitate to contact me should you have any questions or concerns.

Sincerely,

Matthew Mastropietro

After reading and understanding the above notice, if you want to be notified prior to pesticide application, please e-mail Jenifer Johnson at jjohnson@deposit.stier.org

****Only respond to this notice if you want to be notified****
